MEMORANDUM FOR CHAIRMAN, Ad Hoc Requirements Committee

SUBJECT: (Uncld) Request for Geodetic Data

1. The Aeronautical Chart and Information Center has forwarded the inclosed requirements for Geodetic Photo Missions. While the Air Force fully recognizes the importance of obtaining accurate geodetic information for the employment of missiles, it is not intended that geodetic accomplishments have any priority over intelligence requirements.

2. As further requirements are obtained for geodetic information, they will be forwarded to you for use by Project Operations. It is requested that mission planning, when possible, take into consideration the requirements and procedures for obtaining geodetic information. If and when this information is obtained, it is further requested that formal notation be made by reference in the mission summary or similar document.
